FINISH

Turn the tube of knitting inside out, weave in the ends and then turn the tube of knitting right side out.

Using a spare 24 or 32-inch circular needle the same size as or smaller than the needle you used to knit, pick up the 110 stitches of the Provisional Cast On.

Bring the ends of the cowl around to meet each other, making sure there are no twists in the fabric.

Thread the 32-inch tail onto a tapestry needle and holding the two needles parallel with the right side of the fabric facing you, use the Kitchener Stitch to graft one end of the tube to the other.

Weave in the remaining ends and block as desired.
