

Prism Blanket

COLORING WORKSHEET

Use this page to create your own Prism Blanket palette! Print it out and color it in or use a design software to fill in colors right on your computer.

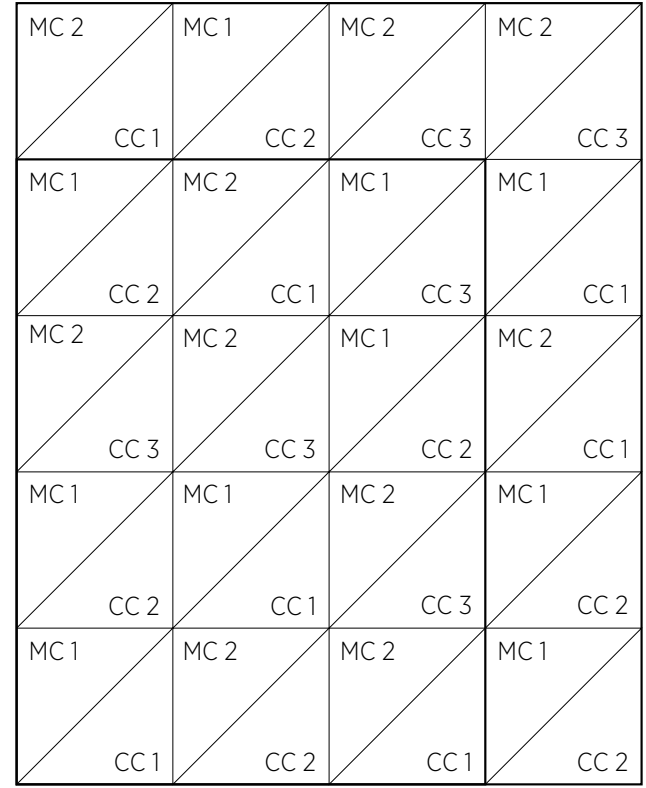

As you play, notice that all the MC triangles are the upper half of the squares and all the CC triangles are the lower half. For our versions, the MCs are in the same color family, and the three CCs come from a different color family. Feel free to do the same or to come up with your own system (or non-system!). We can't wait to see what you make!

OPTION 1

Crib Size Throw Size

OPTION 2

Crib Size Throw Size

KEY

Fill in the Key with your color choices and use it as easy reference when you fill in the schematic, above.
